Forecast for Saturday 14 Aug 2021

Weather: Cloudy during the early hours, with a little rain possible for a time around daybreak. Brightest but rather cloudy during the morning, with low cloud lifting and breaking for a time. This trend should reverse during the afternoon, with cloud thickening and lowering once again, probably becoming extensive into the evening and culminating in rain that will likely prove persistent into the evening. Windy throughout in exposure.

Chance of cloud free mountain/hill tops above 600m: 20% at first with cloud perhaps as low as 400 metres, improving 80% for a time as this lifts and breaks, but falling back to near nil into the evening with cloud nearing many valley floors as winds ease and rain sets in.

Visibility: Moderate early on, with a period of better conditions, although moist air and rather a lot of cloud around will impair viewing distances. Becoming poor into the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Windy throughout in exposure, perhaps most hazardous around dawn as cloud encroaches on higher ground.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sat 14 Aug 2021	0mm	0mm	4.2mm

Forecast for Sunday 15 Aug 2021

Weather: Rather damp and cloudy at first, probably giving way to a heavier spell of rain before perhaps clearing southeastwards late in the day, although there is low confidence in the precise timings. Poor visibility in light winds expected early on, improving later.

Maximum wind: Strengthening northwesterly 40mph.

Chance of cloud free mountain/hill tops above 600m: Nil improving 80% as cloud down to 300 metres lifts clear of summits during the morning.

Visibility: Poor improving very good late on.

Temperature: **Valleys:** Plus 11 becoming plus 17 Celsius.
At 600m: Plus 12 Celsius.
Freezing level: Well above the summits.
